

PENNSYLVANIA COLLEGE OF HEALTH SCIENCES PROFILE:

A dynamic and academically rigorous institution, Pennsylvania College of Health Sciences (PA College) was founded in 1903 and is a private, accredited, four-year college focusing exclusively on the field of health care. Offering associate, bachelor's, master's and doctoral degree programs, as well as a number of certificate programs, PA College provides professional development for health care workers throughout their career. Located in Lancaster, Pennsylvania, the College attracts a select group of students to study with faculty who are experts in their specialty areas. PA College proudly educates for excellence in health care practice, leadership and the continuous acquisition of knowledge.

An affiliation with Penn Medicine Lancaster General Health guarantees that PA College students receive clinical access to one of the largest health systems in south central PA. When the Lancaster General Hospital was founded, its original charter stated it was formed for the purpose of establishing and maintaining a hospital for the treatment and care of the sick and suffering, and the training of nurses to be employed in such care. More than 100 years later, Penn Medicine Lancaster General Health continues to fulfill this mission through Pennsylvania College of Health Sciences. Throughout its more than 100-year history, the College has grown from one nursing program to over 20 health science and nursing programs; from a private home for 40 students, to a dormitory for 240, to an all-commuter campus; and from a handful of students to an enrollment of over 1,800.
